Goals should clearly define what the teacher aims to achieve. Vague objectives like "improve math teaching" lack actionable direction. Instead, specify the content area, skill, or strategy.

- Measurability

Incorporate criteria or indicators that allow for tracking progress. This could include student assessment scores, classroom observations, or self-reflections.

- Achievability

Goals should be realistic given the teacher's context, resources, and time frame. Overly ambitious goals may lead to frustration, while unchallenging goals can stagnate growth.

- Relevance

Goals must align with the teacher's professional needs, school priorities, and student needs to ensure meaningful development.

- Time-bound

Set clear deadlines or checkpoints to maintain focus and momentum.
